

Project Design Phase
Proposed Solution Template

Date	26 February 2026
Project Name	Metro Ticket Booking System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Passengers face long waiting times at metro ticket counters, manual fare calculation, paper ticket management, and delays during peak hours. The existing ticket booking process is time-consuming and lacks a digital, automated solution.
2.	Idea / Solution description	Develop a Metro Ticket Booking System using that enables passengers to book metro tickets online through a user-friendly interface. The system automatically calculates the fare based on source and destination stations, generates a dynamic QR Code as a digital ticket, stores booking information securely in then u_metro_ticket_booking table, and provides a fast, paperless, and contactless ticket booking experience
3.	Novelty / Uniqueness	• Built completely on the ServiceNow platform. • Automatic fare calculation. • Dynamic QR Code generation. • Secure digital ticket management. • Paperless metro ticket booking. • Workflow automation using ServiceNow.
4.	Social Impact / Customer Satisfaction	• Reduces waiting time at metro stations. • Promotes digital and contactless ticket booking. • Minimizes paper usage, supporting environmental sustainability. • Enhances passenger convenience and travel experience. • Improves operational efficiency for metro authorities.
5.	Business Model (Revenue Model)	Revenue is generated through metro ticket sales. Future enhancements may include premium booking services, digital advertisements, integration with online payment gateways, smart card recharge services, and partnerships with metro transportation authorities.

6.	Scalability of the Solution	The solution can be expanded to support multiple metro cities, in addition to the current one, provide mobile application support, enable QR Code validation and ticketing, generate analytics and reports, and integrate with smart transportation systems.
